

13 May 2022

To: Public Utility Commission, Pennsylvania

RE Docket No. L-2019-3010267

Comments reiterating support of the PUC's proposed stricter regulations for hazardous liquids pipelines, like the Mariner East fracked gas project.

To whom this may concern:

I have written before about this subject but I am just writing again since I understand we have a chance to rebut the comments which you have received that say we do not need the above proposed stricter regulations.

Over the last five or so years, the egregious infractions perpetrated again and again by the Sunoco company / Mariner East has made it clear that more stringent regulations are, without a doubt, required. I strongly agree with the comments that support stricter regulations and strongly disagree with those against.

Thank you for considering my opinions,

Sincerely,

Judith Kay McClintock
